Programming Languages & Frameworks: Java, Python, Spring Boot

Front-End Technologies: HTML, CSS, JavaScript, Angular, Bootstrap

Databases: MySQL, MongoDB, Oracle

Tools & Platforms: Git, GitHub, IntelliJ, Eclipse, Android Studio, PyCharm, RESTful APIs

Core Concepts: Data Structures and Algorithms (DSA), Operating System, Version Control, Agile Methodology, Cloud Computing

ACADEMIC PROJECTS

Spring-Stream APIs [\(go-live\)](#)

Engineered a scalable RESTful API ecosystem with secure user management, job-domain tracking, and admin utilities. Integrated Spring Security for authentication, Redis caching for performance, and MongoDB Atlas for cloud data storage. Enhanced developer experience with Swagger documentation and implemented a Weather API for real-time personalized greetings.

HalfGrade Play Quiz [\(go-live\)](#)

Developed an interactive quiz platform enabling users to take quizzes seamlessly with real-time scoring, a timer, and a high-score leaderboard in a user-friendly environment.

E-Commerce Platform

Designed and implemented an online shopping website with product search, user authentication, and a responsive UI for a smooth customer experience.

Online Ticket Reservation

Designed a web-based train ticket booking system with a centralized network. Users can select trains, choose travel dates, and book tickets through an interactive form.
